CREATING EMOTIONS

Brazil Sensations a 100% green DMC

Brazil Sensations is the first Brazilian DMC to engage itself in the carbon offset of its activities.

Besides our daily gestures to minimize our impact to our planet, Brazil Sensations decided not only to be ecological and socially sustainable, but as well to reinforce the regenerative tourism.

Following a long expertise by Agroforestry Carbon, our CO2 emissions are compensated in the form of contribution to certified projects in Brazil.

In line with the UN's Sustainable Development Goals (SDGs), our actions are concentrated in reforestation, preserving forests and its biodiversity as well as renewable energy sources whilst assuring the protection of vulnerable local populations.

These days, it has become difficult to ignore the impact that our tourism projects in Brazil can have to the environment. It is in this context that Brazil Sensations offers the possibility of a solution to every project such as to propose a carbon compensation of each and every journey to our beloved country.

ALTER DO CHÃO

The town of Alter do Chao is located 35 kilometers south of Santarem, in the Brazilian Amazon. Alter do Chao was voted the most beautiful beach in Brazil by the British newspaper The Guardian. In fact, the beaches are worthy of the Caribbean: white sand and crystal clear waters. The town runs along the Rio Tapajos, a confluence of the Amazon River. The beaches appear and disappear to the rhythm of the floods of the Tapajos River. When the water level is at its highest, after the rainy season, the beaches are submerged and you can sail along the river between the treetops.

The adventure begins with a crossing of Lago Verde in a motorized boat to the main beach of Alter do Chão, Ilha do Amor ("The Island of Love"). A hike towards Serra Piroca will take you through "Cerrado" vegetation before starting a steep but relatively short climb of about 1 hour to the top of the Serra, where a spectacular 360-degree view of the Tapajós River, Lago Verde with its bays, the Amazon River to the north, and Alter do Chão to the south awaits you. On the return journey, you'll navigate towards a bay in Lago Verde where you can observe either the Igapós – the submerged forest when the waters are high, or the Igarapés, when the landscape in these Igapós changes completely due to the drier season. After a lunch in the forest, a short siesta in a hammock in the shade is a must. Following the siesta, the experience continues in another flooded forest, denser and with medium-sized trees, where a unique harmonious silence reigns. Upon leaving the igapó, you will ascend the Tapajós River to the Pindobal community. In the late afternoon, a ride along the majestic Tapajós River to Ponta do Muretá or Ponta do Cururu to watch the sunset, accompanied by Tucuxis and pink dolphins, will be the grand finale of this day.
