CREATING EMOTIONS

Brazil Sensations a 100% green DMC

Brazil Sensations is the first Brazilian DMC to engage itself in the carbon offset of its activities.

Besides our daily gestures to minimize our impact to our planet, Brazil Sensations decided not only to be ecological and socially sustainable, but as well to reinforce the regenerative tourism.

Following a long expertise by Agroforestry Carbon, our CO2 emissions are compensated in the form of contribution to certified projects in Brazil.

In line with the UN's Sustainable Development Goals (SDGs), our actions are concentrated in reforestation, preserving forests and its biodiversity as well as renewable energy sources whilst assuring the protection of vulnerable local populations.

These days, it has become difficult to ignore the impact that our tourism projects in Brazil can have to the environment. It is in this context that Brazil Sensations offers the possibility of a solution to every project such as to propose a carbon compensation of each and every journey to our beloved country.

VISIT OF THE CORCOVADO

Duration: 4 hours

Corcovado, meaning "hunchback" in Portuguese, is a mountain in central Rio de Janeiro, Brazil. The 710-metre (2,329 ft) granite peak is located in the Tijuca Forest, a national park. The most popular attraction of Corcovado Mountain is the statue of the Christ the Redeemer and viewing platform at its peak. From the peak's platform, the panoramic view includes downtown Rio, Sugarloaf Mountain, the Lagoa Rodrigo de Freitas (lake), Copacabana and Ipanema beaches, Maracanã Stadium and several of Rio's favelas. The train, older than the statue itself, served to transport the pieces for the construction of the monument for four years. In 1910, this line was the Brazil's first to become electrified and the old coal trains were substituted by electric machines.

ASCENT OF THE SUGARLOAF MOUNTAIN

Duration : 4 hours

The ascent of Sugarloaf Mountain is done by cable car in two stages: the first journey takes you to Urca Mount, where you can already enjoy a breathtaking view of the city. On the second cable car, you will disembark at the top of Sugarloaf Mountain. This name evokes refined sugar blocks placed in clay molds for transport by boat during the sugarcane trade era. However, it's possible that this explanation is just a popular etymology, and the name may derive from the Tupi-Guarani language, Pau-nh-acuqua, meaning "large hill" in English. This peak, a monolithic granite block, is the only one in the city that rises directly from the seashore. It is located on a peninsula at the entrance of Guanabara Bay.
